

Contents :

Efficient Steam Utilisation Control System	01-02
Survey on Power Efficiency in Wireless Communication for 5g Systems	03-06
Machine Learning Approaches for 5g Network Challenges	07-10
Home Security System with GSM Using 8051 Microcontroller	11-14
Study on Application of Six Sigma in Shoe Manufacturing Industry	15-23
The Development of a Visualization Framework Based On Embedded System for Fishing Vessels Using Arduino Board	24-29
Design and analysis of Aerodynamic component for reducing wake of automobile vehicles	30-40
COVID 19 and the Changes in Global Labour Market	41-43
Point Source Model Application in A Case Of Pool Fire Situation In L.P.G. Filling Plant	44-49
Estimation of Item Parameters in Graded Response Model	50-58
Hash Back Testing in Agile Methodology	59-62
Experimental Analysis of Translucent Concrete	63-71
