

Contents :

IoT: False Positive Rate Reduction in Intrusion Detection Systems	72-79
SMART DRAGOMAN: Handwritten Digit Recognition and Text to Speech Translation	80-84
Crowd Control and Monitoring using SSD	85-90
Meticulous Review of Present Trends in Risk Management of Large-Scale Infrastructure Projects	91-95
IoT: False Positive Rate Reduction in Intrusion Detection Systems	96-103
A Comparative Study of Performance Using Sequential Vs Parallel Programming Applied In Genetic Algorithms	104-106
IoT Signal Procedures and Optimization	107-113
Optimization of Feed System Design in Three Plate Mold for Transparent Case of Electric Meter by Mould Flow Analysis	114-132
Absorption Analysis of solution Potassium chromate (K_2CrO_4)	133-135
Analysis and Implementation of Cascaded Multilevel Inverter Topologies	136-140
Mechanical and Thermal Properties of Hybrid Composites Reinforcing with Natural Fibres- A Review	141-145
Study of Drastic Disaster Events between 2010-2020 in District Pithoragarh by Using Remote Sensing and GIS Applications	146-157
Applications of Alenezi Transform for handling Exponential growth and Decay Problems	158-162
