Contents :

Construction Management of A G+10 Residential Building Using Primavera P6	01-05
Convention over Configuration: A Comparative Analysis of Its Impact on Java, Ruby on Rails, and Node.js Framework Adoption in API Development	06-08
Functional-area distribution and non-carcinogenic health risk of heavy metals in street dust from Shanghai, China	09-14
Design and Development of FitQuest: A Fitness Mobile Application for Gym Enthusiasts	15-19
Optimum Biodiesel Production from Shea Nut Oil and Determination of Reactor Pressure by Supercritical Transesterification	20-27
Federated Learning for Secure and Privacy-Aware Smart Meter Data Analytics in Developing Power Grids	28-34
A NOTE ON $ \bar{N}, p_n^\alpha; \delta _k$ SUMMABILITY FACTORS	35-39
spm* - irresolute mappings	40-43
High Impedance Fault Detection and Classification in Distribution Networks Using Machine Learning Techniques	44-51
Evaluating the Potability of Groundwater for Irrigation in Jammu and Kashmir: A quality Assessment	52-66
Design of Wireless Medical Monitoring system	67-74
A Review on the Synthesis Methods, Properties, and Applications of Polyaniline-Based Electrochromic Materials	75-81
DRPA-SAM: Dynamic-Routed Prompt-Aware Adapters for Medical Image Segmentation	82-87
NutriSnap: An AI-Assisted Mobile Application for Carbohydrate and Calorie Tracking with Prescriptive Analytics	88-93
Development and Reaction Mechanism Introduction of Cu-Based Catalysts Applied to CO ₂ RR	94-99
