

# International Journal of Research in Engineering and Science (IJRES)

e-ISSN : 2320-9364

Volume : 8 ~ Issue : 7

p-ISSN : 2320-9356

## Contents :

- |                                                                                                                                                                                                                               |              |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|
| <b>Experimental Research of Saw Dust as Partial Replacement for Fine Aggregate in Production of Sandcrete Hollow Blocks in Nigeria</b><br><i>ADENAIYA, Olumide ,A, UGOCHUKWU, Robert .U, OYEWOLE, Adedayo. M</i>              | <b>01-07</b> |
| <b>Assessment of Awareness and Compliance to Government Regulation Policy Aspect on Quality Control of Building Projects in the Nigerian Construction Industry</b><br><i>Opara Hyginus Emeka</i>                              | <b>08-16</b> |
| <b>Characterization Of Maxima Entropy Functions Using Calculus Of Variations</b><br><i>ANDRÉS PÉREZ</i>                                                                                                                       | <b>17-42</b> |
| <b>An Integration Model for Non-isothermal Solidification of Multi-component Alloys in LBM with Ultrasonic Excitation</b><br><i>Yaoqiang Yu, Tilita George Alexandru, Wenhao Chen, Yinsheng Zhong, Robin Ma, Matthew Yuen</i> | <b>43-57</b> |
| <b>Diminishing and reducing the Heat Treatment time of the Manganese Steel</b><br><i>Samarendra panda, Radha krushna sahu, Swetapadma mishra, Jyoti prakash mishra</i>                                                        | <b>58-61</b> |
| <b>Understudies satellite by Institutions from India</b><br><i>Priyadarshi mrutyunjay padhi, Rama Chandra Parida Satyaban Sahu, KunalChatarjee</i>                                                                            | <b>62-64</b> |
| <b>Wellsprings and non-conventional source of energy</b><br><i>Biswa Ranjan Parida, Madan Mohan Sahu KedarnathHota, Prashant Kumar Nayak, Soumik kumar Swain</i>                                                              | <b>65-67</b> |
| <b>Investigation of processing time and molecule size nano molecule from <math>-Al_2O_3</math></b><br><i>Abhaya Kumar Baliarsing, Prassana Kumar Rout, Chittaranjan Kumar, Ayusman Nayak, Gagan Munda</i>                     | <b>68-74</b> |
